Well, Ann has a new toy. This here really amazing typewriter. (How many of you picked up on that subtle graphic reinforcement of the categories HEAVY, MEDIUM, and LIGHT?) And now to music... Apologies to the Rave Ups, Richard and Fun Stuff Records: We have been playing the album; it just somehow got left off the playlist. Jocks are playing alot of Phranc (yeah!), Husker Du, and Fetchin' Bones. I'm most impressed by 17 Pygmies, Angst (is this really an SST album?), and Scream (let's here it for hometown hard core). And finally, WXDU mourns the "poof" of the legendary Ken Friedman, former Music Director extraordinaire over at WXYC, who was one of the few constants in ever variable college radio. Hi and welcome to MDship to Lisa Marie. Gotta go!
